Author Index Volume 132 (2002)

Billaudel, P., *see* M.S. Mouchaweh (1) 49– 62
Branco, A.C.S., *see* A. Evsukoff (2) 173–188
Brandtberg, T., Individual tree-based species classification in high spatial resolution aerial images of forests using fuzzy sets (3) 371–387

Chen, A.-P., *see* C.-C. Lin (3) 347–352
Cheng, Q. and **Z.-T. Fan**, The stability problem for fuzzy bidirectional associative memories (1) 83– 90
Chow, K.M. and **A.B. Rad**, On-line fuzzy identification using genetic algorithms (2) 147–171

Das, S., Quantifying fuzziness due to the scale of measurement in response systems (3) 317–333
Devillez, A., *see* M.S. Mouchaweh (1) 49– 62

Evsukoff, A., A.C.S. Branco and **S. Galichet**, Structure identification and parameter optimization for non-linear fuzzy modeling (2) 173–188

Falchieri, D., A. Gabrielli and **E. Gandolfi**, Very fast rate 2-input fuzzy processor for high energy physics (2) 261–272
Fan, Z.-T., *see* Q. Cheng (1) 83– 90

Gabrielli, A., *see* D. Falchieri (2) 261–272
Galichet, S., *see* A. Evsukoff (2) 173–188
Gandolfi, E., *see* D. Falchieri (2) 261–272

Hadidi, K., *see* H. Peyravi (2) 245–260
Hájek, P., Observations on the monoidal t-norm logic (1) 107–112
Huang, S.H. and **H. Xing**, Extract intelligible and concise fuzzy rules from neural networks (2) 233–243

Jamison, K.D. and **W.A. Lodwick**, The construction of consistent possibility and necessity measures (1) 1– 10
Jin, R., *see* Y. Zhou (2) 201–216

Kabadi, S.N., *see* L. Li (3) 273–289
Khoei, A., *see* H. Peyravi (2) 245–260

Lahiri, S., Axiomatic characterizations of threshold choice functions for comparison functions (1) 77– 82
Lecolier, G.V., *see* M.S. Mouchaweh (1) 49– 62
Lee, H.-S., Optimal consensus of fuzzy opinions under group decision making environment (3) 303–315
Lee, J.S., *see* J.M. Won (2) 135–146
Li, L., S.N. Kabadi and **K.P.K. Nair**, Fuzzy models for single-period inventory problem (3) 273–289
Li, S., *see* Y. Zhou (2) 201–216
Li, Y.-M., Limit structures over completely distributive lattices (1) 125–134
Lin, C.-C. and **A.-P. Chen**, Generalization of Yang et al.'s method for fuzzy programming with piecewise linear membership functions (3) 347–352
Litz, L., *see* N. Xiong (2) 217–231
Lodwick, W.A., *see* K.D. Jamison (1) 1– 10

Mohan, B.M., *see* A.V. Patel (3) 401–409
Morsi, N.N., Propositional calculus under adjointness (1) 91–106
Mouchaweh, M.S., A. Devillez, G.V. Lecolier and **P. Billaudel**, Incremental learning in Fuzzy Pattern Matching (1) 49– 62

Nair, K.P.K., *see* L. Li (3) 273–289

Padilla-Medina, J.A. and **F.J. Sanchez-Marin**, A fuzzy expert system for evaluating human observers in a visual detection task (3) 389–400
Park, S.Y., *see* J.M. Won (2) 135–146
Patel, A.V. and **B.M. Mohan**, Some numerical aspects of center of area defuzzification method (3) 401–409
Peyravi, H., A. Khoei and **K. Hadidi**, Design of an analog CMOS fuzzy logic controller chip (2) 245–260

Rad, A.B., *see* K.M. Chow (2) 147–171

Sanchez-Marin, F.J., *see* J.A. Padilla-Medina (3) 389–400
Sarkar, M., Rough–fuzzy functions in classification (3) 353–369
Sgarro, A., Possibilistic information theory: a coding theoretic approach (1) 11– 32
Shi, Y., *see* Y. Zhong (3) 335–346
Simon, D., Training fuzzy systems with the extended Kalman filter (2) 189–199

Elsevier Science B.V.
PII: S0165-0114(02)00489-X

Wang, Z. and **Y. Yu,** Pseudo-t-norms and implication operators on a complete Brouwerian lattice (1) 113–124
Wolff, K.E., Concepts in Fuzzy Scaling Theory: order and granularity (1) 63– 76
Won, J.M., S.Y. Park and **J.S. Lee,** Parameter conditions for monotonic Takagi–Sugeno–Kang fuzzy system (2) 135–146

Xing, H., *see* S.H. Huang (2) 233–243
Xiong, N. and **L. Litz,** Reduction of fuzzy control rules by means of premise learning – method and case study (2) 217–231

Yamada, K., Possibilistic causality consistency problem based on asymmetrically-valued causal model (1) 33– 48
Yoshida, Y., Fuzzy stopping in continuous-time dynamic fuzzy systems (3) 291–301
Yu, Y., *see* Z. Wang (1) 113–124

Zhong, Y. and **Y. Shi,** Duality in fuzzy multicriteria and multi-constraint level linear programming: a parametric approach (3) 335–346
Zhou, Y., S. Li and **R. Jin,** A new fuzzy neural network with fast learning algorithm and guaranteed stability for manufacturing process control (2) 201–216
